

TURKU BUSINESS REGION

TURKU BUSINESS REGION

Networking with impact

Turku Business Region is the most dynamic business and innovation cluster in Finland.

The region's 22,000 enterprises, six universities and extensive network of different providers contribute to the creation of new products and services and growth of business operations, as well as local well-being.

SPEARHEAD FIELDS

When the Turku Region business world meets the research communities, the result is innovations for exports around the world. These encounters are fostered by public actors – Turku and the neighbouring municipalities, and the business service provider Turku Science Park Ltd.

© Rolls-Royce

Five international spearhead fields with leading expertise highlight the peak of local know-how.

Global trailblazer of maritime industry.

Wide range of Life Science expertise.

The latest technological innovations.

Experience industry from movies and games to tourism.

Bio and circular economies and sustainable development.

The key factors for the future success of the spearhead fields are top research in the region, growth and development oriented enterprises, and business-friendly municipalities and towns that are actively searching for new operating models. Together they form a strong network which is also used for systematic development of business activities that offer smart city solutions.
