Dr. JOY WOLFRAM
Assistant Professor at Mayo Clinic

PRESENTATION:

NANOMEDICINE FOR CANCER AND BEYOND

The application of nanotechnology in medicine provides new and innovative solutions to diagnose and treat disease, as nanoscale structures exhibit multifunctionality, unique electromagnetic properties, and distinct biodistribution profiles that can be exploited.

PRESENTER: Dr. Joy Wolfram

Dr. Joy Wolfram is an Assistant Professor at the renowned Mayo Clinic where she leads a research group focusing on the development of new strategies for cancer treatment using nanotechnology. Dr. Wolfram's goal is to bring new nanomedicines with increased therapeutic efficacy and safety to the clinic.

Native of Finland, Dr. Joy Wolfram, was selected among the world's 30 most promising healthcare professionals under the age of 30 by Forbes magazine. Dr. Wolfram has also received more than 25 scientific awards from seven different countries and has authored more than 50 publications in the past five years.
